

Title: (your project with application)

Abstract: (200 words)

- Introduce the application and why your project is significant for this application (2 lines).
- Method (3-4 lines)
- Result (2 lines)
- Conclusion (1 line)

Introduction:

- Background regarding the application
- Statement of the problem
- project objective
- project hypothesis

Methodology:

Overall Framework

- (Illustration of implemented hardware with proper labeling of various parts)
- (Explain the diagram concerning each IoT layer like Sensing, Communicating, Networking, Actuating, etc.)
- (Illustration of simulation part with proper explanation and how many layers you actually managed to simulate)
- (image of finally implemented project code with explanation)

Results:

- Analysis of project-generated data with the help of supporting graphs and tables

Conclusion:

- Restate your project
- Outcomes
- Limitations
- Future direction

N.B.: Additional front page (containing logo of CUET, Course No. & title, Submitted by –IDs' of group members, and submitted to) must be added to the final report.
